# The themes

---

- **Local action for health - Natural common goods.**
- **Responsible consumption and lifestyle choices.**
- **Planning, design-Better mobility, less traffic.**
- **Local to global: Energy and Climate change.**
- **Vibrant, sustainable local economy and Social equity, justice and coesion.**
- **Local Management towards sustainability and Governance.**

# The 25 indicators

- 📁 Air quality: **PM<sub>10</sub>** concentrations
- 📄 Air quality: **NO<sub>2</sub>** concentrations
- 📄 **Noise** map and noise reduction plan
- 📄 Domestic **water consumption**
- 📄 Inhabitants served by **water treatment** plants
- 🕒 **Electric consumption** variation
- 📄 Amount of **municipal waste** produced
- 🗑️ Municipal waste, **differentiated collection**
- 🗑️ **Green public procurement**, procedures and purchasing
- 🚗 **Passengers** travelling on **public transport**
- 🚗 **Underground and tram** lines in the urban area
- 📄 Number of registered **cars**

# The 25 indicators

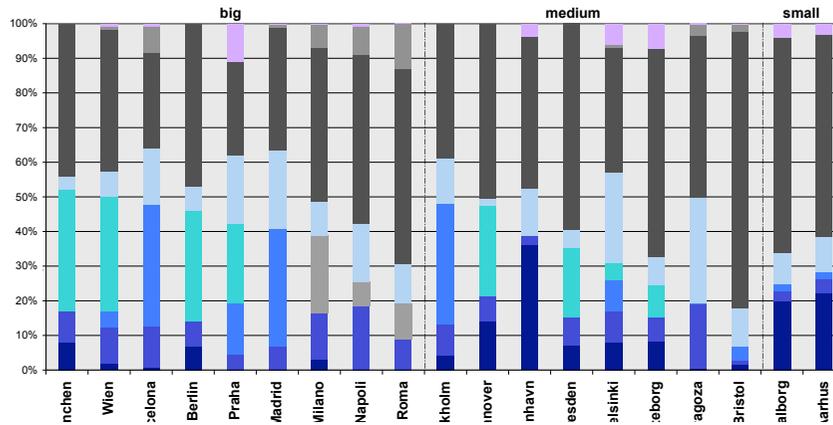

-  **Cycle** paths and lanes availability
-  Public **green areas** availability
-  Energy Balance and **CO<sub>2</sub> reduction target**
-  **Solar power** generation in public buildings
-  Inhabitants connected to **district heating** system
-  Climate and **Energy saving policies**
-  Demographic and **old age dependency**
-  **Female employment**
-  Population qualified at **highest level of education**
-  **Env. Certification of** public authorities
-  Level of mplementation of **Agenda 21** processes
-  **Electorate voting** in city elections
-  City **representatives** who are **women**

# 2006-2007 data collection: 32 cities - 16 Countries

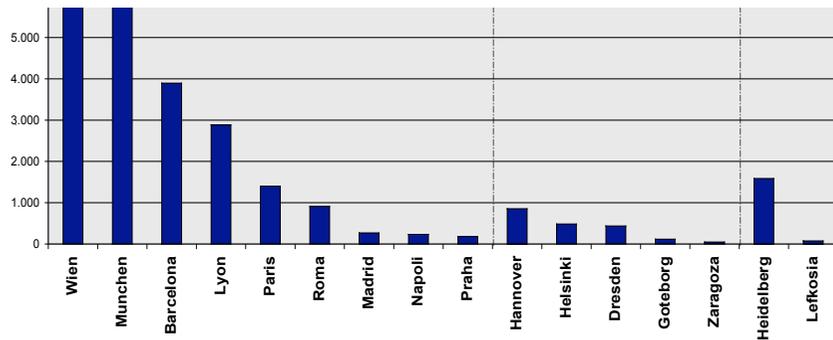

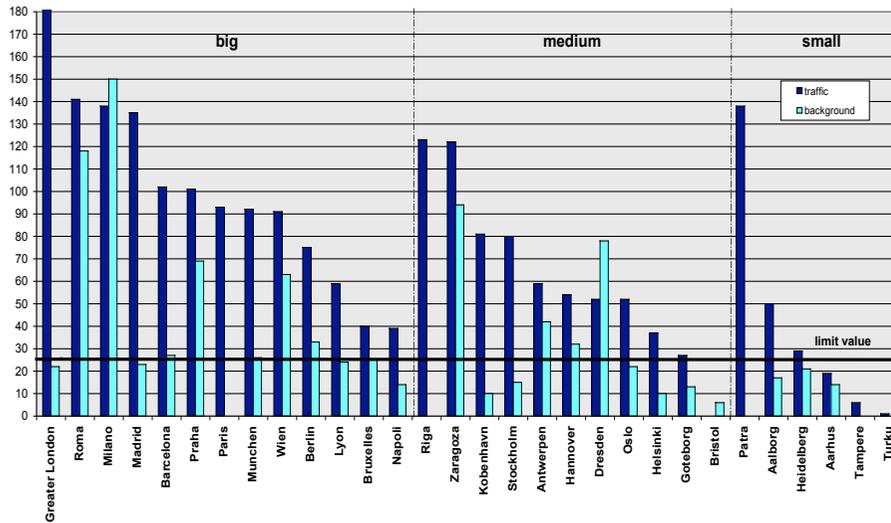

Metropol. areas	Big	Medium	Medium-small
<b>Berlin</b> <b>G. London</b> <b>G. Lyon</b> <b>Madrid</b> <b>Paris</b> <b>Roma</b>	<b>Barcelona</b> <b>Brussels</b> <b>Milano</b> <b>Napoli</b> <b>Praha</b> <b>Wien</b> <b>Munchen</b>	<b>Antwerpen</b> <b>Kobenh.</b> <b>Dresden</b> <b>Goteborg</b> <b>Helsinki</b> <b>Riga</b> <b>Stockholm</b> <b>Zaragoza</b> <b>Hannover</b> <b>Oslo</b>	<b>Bristol</b> <b>Aarhus</b> <b>Heidelberg</b> <b>Lefkosa</b> <b>Tampere</b> <b>Turku</b> <b>Patra</b> <b>Durres</b> <b>Aalborg</b>

**10 northern; 10 central; 9 southern; 3 eastern**

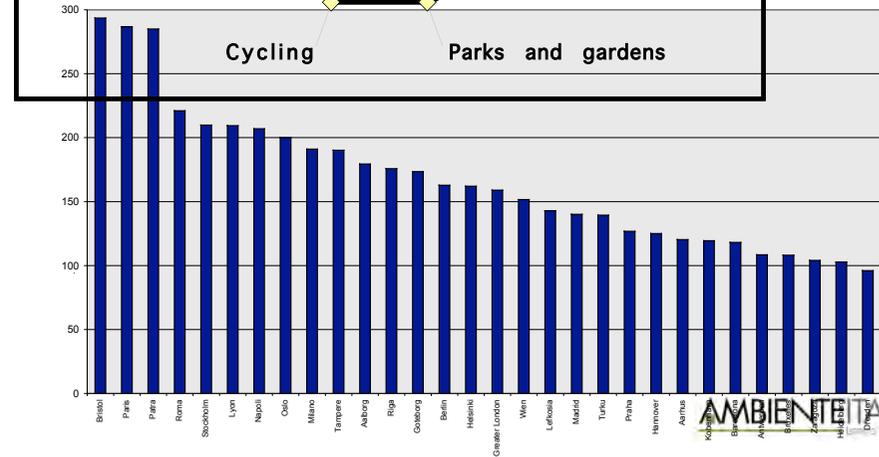

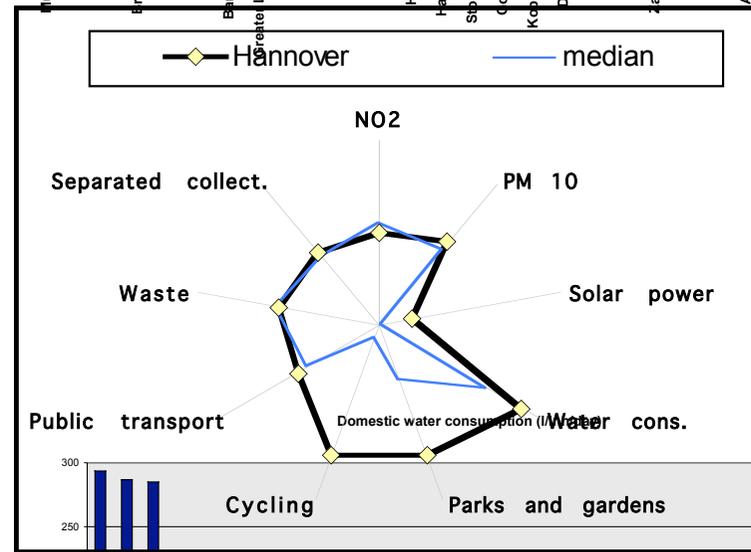

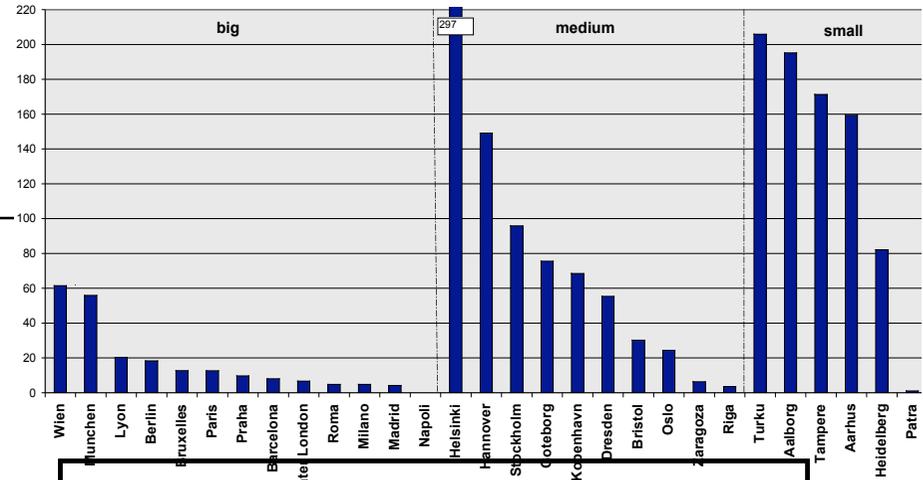

Percentage of journeys to work (%)

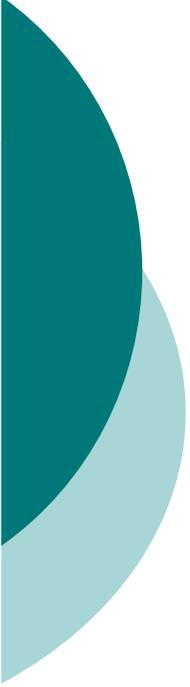

PM10: number of daily means exceeding 50 µg/mc (highest values)

Cycle paths and lanes (m/100 inh)

## How is critical the situation? Are there positive reactions?

- European citizens are exposed to relevant **health risks**, due to **air pollution**. The situation is still **over the limit**.
- **Car** users are invading cities, but **local policies could succeed**.
- Municipal waste are a **waste of energy** and materials, but local policies and life styles **make the difference**.
- Risks due to **climate changes** could be avoided also thanks to local administrations, but now **it's time to act**.

# Is a sustainable city achievable? It could be IF...

- If **Air quality standards are respected** as in Goteborg (and Helsinki).
- If **Water consumptions are 100** liters/inhab, as in Dresden, Zaragoza and Heidelberg and if **100% of inhabitants is served by Water treatment** (as most european cities, but not all).
- If **Waste production is under 334kg/inhab/year** as in Dresden or, at least, **Not differentiated waste is under 250kg/inhabitants/year** as in Munchen and Antwerpen, thanks to **Separate collection up to 62%** as in Aalborg or **up to 50%** as in Hannover and Helsinki.

# Is a sustainable city achievable? It could be IF...

- If **Public procurement is extensively green** as in Kobenhavn and **electric consumptions** in the last 5 years **have been reduced**, as in Oslo (-26%).
- If **Public transport is widely used** as in Prague, Stockholm and Wien (**58, 47 and 45% of home to work trips**) and **citizens are satisfied of its quality** as in Wien, Munchen and Berlin.
- If **Car is used less than other means**, as in Barcelona and Madrid (**35% of the total home to work trips**) and **its ownership is a “past life style”** as in Kobenhavn and Riga (**20 cars/100 inhab.**) or as in Berlin, London, and Paris (30).

# Is a sustainable city achievable? It could be IF...

- If **Bicycle** is the mean of transport **of the future** as in Kobenhavn (**29%**) also thanks to a **wide bike network** as in Helsinki (**1.500 km**), in Stockholm and in Hannover (about **750 km**).
- If citizens have **more then 200 sqm each of green areas** (of which more then **40 sqm/inhab of urban parks**), as in Oslo and in Goteborg.
- If a large number of **public buildings use solar panels** to produce hot water or electricity as in Wien, Munchen and Barcelona and **have been audited and retrofitted to improve their energy efficiency** as the 80% of them in Helsinki.

# Is a sustainable city achievable? It could be IF...

- If **more than 93% of the population is served by district heating** as in Helsinki and in Kobenhavn and more than **25% of municipality's energy consumptions is "green"** as in Oslo and Heidelberg.
- If **Integrated environmental management schemes** (ISO or EMAS) **have been applied** to improve the efficiency of the public administrations as in Kobenhavn, Bristol and Oslo and if **Agenda 21 participated processes have been well developed** as in Aalborg, Hannover, Munchen and Stockholm.

# Is a sustainable city achievable? It could be IF...

- If **Women role is promoted (> 70% activity rate** in the labour market) as in all nordic and german cities **and if is recognised (>50% of elected representatives** in the municipality) as in Stockholm.
- If the **city environment is friendly for children and attractive for young people**, as in Kobenhavn, Munchen, Berlin, and if citizens have **very high educational level** as in Dresden, Praha and the other german cities.
- If **Citizens participate to local election (>80%)** as in Riga and in all the Danish, Belgian and Italian cities.

# Good practices are always behind good performances

# Urban Ecosystem Europe

---

**We are preparing an updated edition of the UEE reporting mechanism, expected for september 2009.**

**In January 2009 we will start an FP7 Project (PRIMUS, coordinated by Iclei) with the aim to refine the indicator set together with involved cities and stakeholders.**

**We plan to collect data from about 100 cities during 2010.**

**Welcome to new participating capital cities, other endorsers and sponsors !**
